THIS IS UNEVALUATED INFORMATION

25X1

1. In January 1950, work was completed on a new reinforced concrete underground ammunition dump built in the fields of the former Tietelbaum farm between Topolcany (P49/T64) and Tovarniky (P49/T65). The dump is 10 m deep and 600 m by 120 m in area. It was built by the Topolcany branch of the Czechoslovak Building Enterprise, national corporation, under the supervision of Ing. Adda. The dump is now being guarded by a six to eight man military unit.
2. Military reservists in the Spigaska Nova Ves area have received instructions from the District Recruitment Command (okresni doplnovaci velitelstvi) to report within six hours to the nearest garrison in case of the declaration of general mobilization instead of reporting to a predesignated unit. It is believed that this change in regulations was made in order to keep secret the disposition of reserves in case of war.

Encl: Sketch of the area of the Topolcany ammunition dump.
